TransCanada Transmission Plan 2011-2020

ZEPHYR PROJECT 2016

Project Sponsor:	TransCanada Corporation
Project Participants:	None
Project Description:	A new 3000 MW, 500 kV DC transmission line between Wyoming and Nevada
Voltage Class:	500 kV DC
Facility Rating:	3000
Point of Origin:	Southeast Wyoming near Chugwater
Point of Termination:	Eldorado Valley, Nevada, south of Las Vegas
Intermediate Points:	Borah Substation near American Falls Idaho (optional)
Length of Line (in Miles):	1000
Development Status:	Planned – Fully subscribed with credit worth wind generators
Routing:	Generally west from Chugwater and south in eastern Nevada to the Eldorado Valley south of Las Vegas
Subregional Planning Group:	Other

Purpose of Project: The project is designed to deliver high capacity factor wind to southwest markets directly benefiting the states crossed and consumers in the Southwestern U.S. Zephyr would make a substantial contribution to achieving state RPS and federal climate change objectives.

After a FERC approved open season, Zephyr is fully subscribed by credit worthy wind developers (an industry first) as follows:

- Pathfinder Renewable Wind Energy 2100 MW
- BP Wind Energy North America 500 MW
- Horizon Wind Energy 400 MW

Estimated Cost (in 2010 Dollars): \$3,000,000,000

Schedule:

Construction Start Date:	2014
Planned In-Service Date:	2016
Permitting Status:	N/A

TransCanada Transmission Plan 2011-2020

CHINOOK PROJECT

2018

Project Sponsor:	TransCanada Corporation
Project Participants:	None
Project Description:	A new 3000 MW, 500 kV DC transmission line between Montana and Nevada
Voltage Class:	500 kV DC
Facility Rating:	3000
Point of Origin:	Central Montana near Harlowton
Point of Termination:	Eldorado Valley, Nevada, south of Las Vegas
Intermediate Points:	Borah Substation near American Falls Idaho (optional)
Length of Line (in Miles):	1000
Development Status:	Planned The FERC approved open season closed on December 16, 2010.
Routing:	Generally southwest from the Harlowton, MT area through Idaho to the northeast corner of Nevada then south through eastern Nevada to the Eldorado Valley south of Las Vegas
Subregional Planning Group:	Other
Purpose of Project:	The project is designed to deliver energy to the southwest markets as well as improving the reliability of the western interconnection and increasing market liquidity.
Estimated Cost (in 2010 Dollars):	\$3,000,000,000
Schedule:	
Construction Start Date:	2015
Planned In-Service Date:	2018
Permitting Status:	N/A
